

<<< Exam #2 sample solution >>>
 -- Fall, 1999

1. min BH.

(a)

min
 -1--2--7--4--3--5--6--8--

(b) delete_min

min
 2 5 8
 | \ |
 7 3 6
 |
 4

2. 2P min PH

(a) insert (meld)

 3
 / \
 +-----+ 4
 | | | | | / \
 11 10 9 8 7 5 6

(b) delete_min (meld in 2 pass)

 4
 / / | \ \
 10 8 7 5 6
 / |
 11 9

(c) decrease_key : 8 → 2 (meld subtree & main tree)

 2
 / \
 / \
 / \

3. AVL insert

: rotation types used : RR, RL, LR

4. 2-3 tree

(a)

delete 3:

(b)

insert 7:

5. RB

rotation types / color flips used : RRr, RLb, LLr, LLb

6. merits of RB

- o efficient join and split of small & big trees.
- o no waste of memory space
- o no data movement within node
